-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

The specification, page 1, line 4, after "10/310,195" should be inserted the following " now issued U.S. Patent No. 6,738,138".

Claim Objections

Claims 1-12 are objected to because of the following informalities:

Claim 1, line 7; Claim 11, line 10, "the optical axis" should be changed to "the optical axis of the lens" to enhance the meaning of the limitation. "the optical axis" lack of antecedent and basis.

Claims 2-10,12 are objected as being depended on the objected claim.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2877

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,515,744. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the limitations in claims 1-12 of the application are disclosed in claims 1-14 of the U.S. Patent No. 6,515,744.

Claims 1-12 would be allowable if Applicant amend the claims to overcome the objection discussed above and file a Terminal Disclaimer to overcome the Double Patenting rejection.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: Prior arts of record do not disclose a method for evaluating a sample. The method comprises: focusing a beam to a spot on a sample surface, using a lens, said lens having a curved focusing surface and being formed from a material whose index of refraction varies along the optical axis of the lens in order to substantially reduce spherical aberration, and wherein said lens is supported in a low stress lens mount including a resilient member for supporting the lens in a manner to reduce stress birefringence in the lens induced by changes in the ambient temperature which structurally arranged and functionally operated as claimed in claims 1,11.
